

Rola-Trac™

MACROTRAC FAMILY

Part of the MacroTrac family of matting products in the America's, Rola-Trac is durable, lightweight and easy-to- install. Providing outstanding indoor and outdoor flooring, Rola-trac is slip-resistant and provides a safe and clean work or leisure surface.

Rola-Trac has endless commercial, residential and military uses and has been used as garage flooring, event and tent flooring, hard standing and military tent flooring, walkways and paths, patios, pet areas, indoor and outdoor displays, athletic field coverings, and accessibility access.

Light Weight Temporary and Permanent Flooring

Features

Extreme strength to weight ratio. Has a load capacity of 8,000 lbs per sq ft.*

Light weight construction has each panel weighing only 0.4 pounds

Quick and easy to install and extract from any site. Deployed in pre-assembled sections

Easy to use at any site. Can be laid in minutes over almost any surface.

Providing a stable, non-slip, non-reflective surface, Rola-Trac is designed for pedestrian safety with molded-in rain channels and multi-directional tread. Edging ramps allow for easy wheelchair access and eliminate trip hazards.

With aeration slots in the panels that allow moisture and air to pass through, Rola-Trac provides excellent turf protection. Then unique design disperses weight across the panels, minimizing traffic impact and damage.

Benefits of Using Rola-Trac™

Permanent Flooring
Rola-Trac is easy-to-install and requires no special skills or tools for installation. It is delivered in small sheets — simply lay them next to one another and walk along the seam to snap them together.

Temporary Flooring
Rola-Trac is designed for strength and durability with U-shaped ribs that provide twice the strength of a normal rib without adding bulk. The light weight design makes it easily portable for many indoor/outdoor uses.

Safety
Providing a stable, non-slip, non-reflective surface, Rola-Trac is designed for safety with molded-in moisture channels and multi-directional tread. Edging ramps allow for small wheel access and eliminates trip hazards.

Ground Protection
Rola-trac provides excellent drainage and turf protection due to aeration slots that allow moisture and air to pass through. The unique design disperses weight, minimizing traffic impact and allowing the system to conform to terrain.

Rola-Trac™
Specifications

Panel Size	13.0 x 6.5 x 0.6" (L x W x H)
Panel Area	0.59 Sq Ft
Panel Weight	0.4 lbs
Load Capacity	8,000 lbs / Sq Ft (55.6 psi)*
Fire Ratings	UL94HB, ASTM 2859
Material	High-impact polypropylene with UV inhibitors

*Static load, solid sub-surface. Varies depending on sub-surface
